Sir:

## **AMENDMENT**

In response to the Office Action, mailed December 20, 2002, Applicant requests that the above-captioned patent application be amended as follows:

## IN THE DRAWINGS

Please cancel Figures 9a and 9c, and substitute new Figures 9a and 9c, and new Figure 1h.

## IN THE SPECIFICATION

Please delete the paragraph commencing on page 12, line 12, without prejudice.

Please amend the paragraph beginning on page 10, line 23 to read as follows:

Fig. 1a shows a schematic overview of the present invention. Prime mover 11 is connected to an electric generator 15 via shaft 13. Generator 15 is connected to control mechanism 19, which may take the form of a power electronic load, as described in Example 3, below, via wiring 17. Control mechanism 19 is further electrically connected to an electrical load 22. The control mechanism 19 has an input 65. The generator 15 may be a direct current generator (hereafter, DC), or an alternating current generator (hereafter, AC), as described in the embodiments below, and with reference to the descriptions of various types of generators in the
